

Basic knowledge for health questions, spiritually inquired and answered here.

Endometriosis: Connections and healing possibilities, clarification in a spiritual point of view.

This is Maria Isis, greetings.

Perhaps you are surprised about my existence in the context of this theme, but I am a woman. I know "being a woman", I know the woman's cycle, I myself have experienced it. I know the concerns of women regarding their bodies, their women's ailments, their concerns, be they physical, be they psychological, be they spiritual.

I am a high priestess, I understand my craft very well and from my knowledge I want to tell you.

You humans have the ability of differentiation, of exact concretization. You find names for everything that is. Yes, it is important that things can be named, that we give things a name. Only in this way can we learn more about these things, because every name carries an energy in itself, so also this name of endometriosis.

Endometriosis is a growth.

What is growing in a woman's body? Often it is pain, often it is grueling thoughts, often it is anger, dissatisfaction - all that she cannot express. And many women have had their mouths closed! Many women were not allowed to show their feelings. At most, when they were among themselves, there they could exchange, there their own suffering became shared suffering.

But can a man understand a woman?

Can children understand the mother? But the mother's illness is not the children's business!

A woman is often very lonely with her body, with her thoughts, with her effects of the thoughts. Because through the COLLECTIVE she has been very strongly marked that she is not heard, that she is not seen, that she is nothing, that she has nothing to say.

That's why many women have withdrawn, retreated into the innermost, with everything that has moved them, with everything that has pained them. I have seen it myself, I have experienced it.

So many women have come to me, so many women have I taught, so that they could shed this shame, this pain, this anger, this doubt, this inability, to come into their true power.

The subject of an endometriosis is the power - the power that is not there - the power that is "overgrown" by completely different thoughts, thoughts in a lower vibration, thoughts in a negative vibration, lightless thoughts. And such thoughts spread in the body. And because they are often thoughts in connection with one's own femininity, with one's own motherliness, these thoughts materialize in the form of a tissue in the uterus.

They have a strong blood supply, spongy tissue, and every month the mucous membrane sheds, it bleeds. Blood is life force, blood is life energy, blood carries the feelings of the woman. All that goes away, far too much goes away! She loses her life force, she loses some of her feelings, she loses substance. The whole thing weakens her month after month, when she has no possibility to change this.

Medicine has a way, it removes the uterus. Something very simple, she claims. Yes, maybe the procedure is very simple for medicine, for surgeons.

But what does THAT mean for the woman?

The most feminine thing in her, the organ through which she gives birth to children, is snatched away from her, is taken away from her, is disposed of. And this is a GREAT DEEP pain in every woman. For ALL women are connected, as ALL people are connected, as the earth is connected to people, as the cosmos is connected to people. EVERYTHING is a wholeness.

And with each uterus removed, there is a new pain, an even deeper pain.

And this pain is anchored in the collective, the collective cries: "this pain"!

It is the deepest pain of the woman, which the collective gives from itself.

And mother earth cries, because she also knows this pain - on another level.

But what do the people do with mother earth?

She, too, is deprived of a great deal, a great deal is torn from her, she is hollowed out, pierced, pierced.

It is the same, how happens to the woman!

This pain - heal this, your pain!

When you heal yourself, you also heal the pain of Mother Earth, because you are connected! She too has given birth to life, she gives birth to new life every day. And you, woman, you carry THAT in you, you also give birth to life!

Unleash yourself from this pain, this sorrow, this anger, this suffering.

You alone cannot do it. Therefore it is very important to accept help!

Help in the circle of women, help in the circle of nature.

There are many women who have learned to help heal these wounds, so that YOU can come into your own power, so that YOU can perceive your power!

Who are YOU as a woman? What are your needs as a woman?

What do YOU need as a woman? What do YOU love as a woman?

All this is to be explored, fathomed, uncovered and strengthened so that it can be brought into life!

It is a spiritually blissful work. A work with Mother Nature that helps every woman to come into her own nature, to perceive her own nature, to get to know it.

The uterus of Mother Nature, of Mother Earth, is one with the uterus of the woman. One is pain, one is also liberation, and one is love.

Therefore work with Mother Earth, look for women who are knowledgeable in this! Look for priestesses, shamanesses, healers, who accompany you - woman - on this deep inner way to your own femininity!

Then the tissue will soften, then it will fall off from you.

Then the uterus will grow into another, into a new power, because YOU will get to know yourself, because YOU will get to know your needs, because YOU will know what femininity means for you, what femininity is, and how you can express this femininity.

THIS is the cure for endometriosis, bless you.
